

Statement of Purpose for the UNIS Hanoi Scholarships Programme

UNIS Hanoi is proud to be a learning community that values diversity, inclusivity and actively encourages equality for all. We are a school that welcomes into our classrooms students from more than 60 nations every day.

Our Strategic Management Plan states as one of its main objectives that our “community actively collaborates to engender an inclusive, ethical environment based on transparency and security.”

However, we also recognize that a UNIS Hanoi education is beyond the financial means of most Vietnamese families in our host country, and as such, we risk a socio-economic elitism contrary to our mission.

The purpose of the UNIS Hanoi Scholarship Programme is to bridge that divide thus honoring our commitment to diversity and the richness that inclusivity in all its definitions can bring to the school.

The Scholarship Programme aims to both enrich the UNIS Hanoi student body and empower the scholarship student. We believe in the transformative power of education at its best, its power to change lives.

UNIS Hanoi was founded by the United Nations and is committed to its principles, both inspiring and empowering a better world. As such, we also see the Scholarship Programme as a continuation of our investment in Vietnam both for today – transforming the education opportunities of young students – and for tomorrow – contributing to the human resources development strategy of the country, an acknowledged primary goal for the Vietnamese Government.

In short:

- Demonstrably living our mission, fulfilling a commitment to diversity and inclusivity for our students
- Building a committed alumni community, giving back to UNIS, Hanoi, Vietnam and the world
- Enhancing the School’s institutional reputation with all constituencies
- Demonstrating to our host country and the wider community our desire to share education as a resource and to serve a wider range of host country students
